

Tool Crib's Tool Cutting Oil is a clear, lightweight oil that improves metal cutting operations by cooling and lubricating at the cutting point. This oil outperforms average cutting oils due to the special anti-friction agents added. It resists runoff, eliminates scoring and chatter marks, and prolongs the life of your blades. It is effective for both ferrous and non-ferrous machining. An extension tube is provided for pinpoint application and sprays in any position.

FEATURES & BENEFITS

- Ideal for metal cutting, drilling, tapping, threading, and gear cutting
- Works for machining tough metals such as stainless steel, aluminum, and titanium
- Extends blade life
- Contains anti-friction additives

PRODUCT SPECIFICATIONS

Part No. 620-1557

Size: 20 oz. Can / 18 oz. Net Wt.

Case Pack 6
